

April 2, 2026

Greetings and salutations friends,

This is a letter to the world. Collectively, we have been through it with COVID. That was a scary time in history. Now that we've come through to the other end, many of us are more aware and awake than ever. Out of necessity and distrust of the medical community and Big Pharma, so many of us have become our own health advocates. MAHA Moms are a force to be reckoned with today. We don't just blindly believe the scoundrels in the medical community who lied to our faces and hid the truth about the vaccine and other treatments that could have saved lives.

We found out through our own research and Doctors who actually care that many over the counter supplements can resolve a lot of the ailments plaguing us today. We the people have resorted to learning about our own health and safer remedies to get our wellness on track.

One strong need I found is people have been massively sharing information about health and wellness. There's clearly a huge demand for it, which is why it shows up all over social media. The problem is, one view of a video and it's typically gone. It's really hard to find that bit of information we just watched after it's swiped to the next clip.

I created <https://YourBestHealthy.life/> to be a library of sorts. A repository to build with information that is free and shareable to anyone.

One of the most important bits of information to share, I have found, is regarding cancer research. One of the most promising is information about Ivermectin. During COVID, the news media and our government stated that ivermectin was horse dewormer paste that could kill the people who took it. We now know they were lying to our faces and why. Ivermectin is cheap. It cannot be patented and owned by Big Pharma, so they can't profit from it and now it's available over the counter like many countries in 4 US States. Ivermectin is so safe, billions of doses have been administered globally without issue. Ivermectin is a Nobel prize winning drug because of how many lives it has saved worldwide as a parasite killer.

Now, the research community has found ivermectin has amazing promise in the field of **cancer treatment**. Look at the website and this document for the data and video clip references. Hopefully, you will come to the same conclusions these doctors have and become a success story for others to learn from.

Each link added has a corresponding QR code to pop up on your phone and share.

This is one of the pages I created with all the subjects relating to ivermectin for you to browse.

<https://YourBestHealthy.life/ivm>

This post on X by Joe Tippens. His description shows he is a cancer survivor. He used alternative methods like Ivermectin to overcome his illness after being given a few weeks to live.

<https://yourbesthealthy.life/page-2.php?nid=97>

This is Dr William Makis. He discusses in length the testimonials from patients - some of them beyond help from traditional cancer treatment methods. They heard about ivermectin and basically had nothing to lose.

<https://x.com/MakisMedicine?s=20>

Here is Dr Kathleen Ruddy speaking about her experience with a patient who had cancer.

<https://yourbesthealthy.life/page-2.php?nid=19>

Is Ivermectin Safe? Watch THIS:

<https://yourbesthealthy.life/page-2.php?nid=95>

What dosages should a person use for Ivermectin? Look here for Dr William Makis' recommendation:

<https://yourbesthealthy.life/page-2.php?nid=96>

Mel Gibson talking to Joe Rogan about friends who no longer have cancer:

<https://yourbesthealthy.life/page-2.php?nid=20>

Another testimonial from Dr Makis: Patient goes from Stage 4 Pancreatic Cancer to CANCER FREE in 2.5 months!!! Read this. Big Pharma hates this!

<https://yourbesthealthy.life/page-2.php?nid=46>

How can I get Ivermectin without a prescription - sent to my home - totally legally? Tennessee and 3 other states passed laws, permitting Ivermectin to be sold **over the counter** like aspirin. No prescription necessary and completely legal. It is completely safe and will not interfere with other remedies a patient might be using.

This pharmacy is a licensed US Pharmacy. The medicine is compounded in Tennessee - not CHINA. No counterfeit medicine.

Access this pharmacy in Tennessee which has their site set up to guide a person to self medicate. How much to order... cost... etc:

<https://yourbesthealthy.life/page-2.php?nid=98>

THIS IS IMPORTANT!

If you are taking Ivermectin and feel 'off' - it may be because you need a binder to clear out the toxins associated with Ivermectin killing off the parasites.

Watch this to understand more.

<https://yourbesthealthy.life/page-2.php?nid=109>

This explains the binder Zeolite and how to purchase

With this information you can decide for yourself. This is the definition of informed consent. It is amazing what Doctors who actually care about the well being of their patients are finding inexpensive and safe ways to help save lives.

We need to look out for one another • Don't lose hope • Someone out there needs you!

Take care
Your Best Healthy Life

How do I scan these QR Codes?

I tested each QR code, but every phone may be different. The best way to scan the QR codes and get your phone to pick it up... zoom in with the camera on the specific QR code and then access the link. Each link is also shown in the description just in case.

EXAMPLE
